

HARSH PANDEY

Full Stack Developer (Web & Desktop)

Uttarakhand, India | +91 9411378054 | pandeygautam039@gmail.com | gamerpandeyharsh@gmail.com

GitHub: <https://github.com/201Harsh> | **LinkedIn:** <https://linkedin.com/in/201harsh>

PROFESSIONAL SUMMARY

Full Stack Developer specializing in TypeScript and JavaScript with strong expertise in Next.js, Node.js, Express.js, MongoDB, and MySQL. Experienced in building scalable web and desktop applications using Electron, real-time systems with WebSockets and Server-Sent Events (SSE), and CI/CD-driven deployment workflows. Strong foundation in backend architecture, API design, asynchronous programming, and automation systems.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript (ES6+), Python, SQL

Frontend: Next.js, React.js, Tailwind CSS, Responsive UI, State Management

Backend: Node.js, Express.js, RESTful APIs, Authentication (JWT), Event-Driven Architecture

Databases: MongoDB, MySQL

Desktop Development: Electron.js, System-Level Automation, ADB Integration

Real-Time: WebSockets, Server-Sent Events (SSE)

DevOps: Git, GitHub, CI/CD Pipelines, Linux, Postman, Vercel, Render

Concepts: Data Structures, Software Architecture, API Integration, Asynchronous Systems

PROJECTS

IRIS AI (Project JARVIS) – Autonomous Voice-First AI Assistant

Electron.js, React.js, TypeScript, WebSockets

Engineered a voice-first autonomous AI desktop assistant with ultra-low latency real-time communication pipeline. Built full desktop and mobile control via voice including file search, application execution, keyboard/mouse automation, and Android ADB-based app control and notification monitoring. Designed scalable multi-step automation framework beyond traditional chatbot systems.

Status: In Active Development

XBLT – AI Web & Desktop Application Builder

Next.js, Node.js, Electron

Developed an AI-powered web and desktop builder capable of generating full-stack applications including frontend, backend APIs, and structured architecture with live streaming preview and real-time execution.

Status: In Active Development

Varon AI – Multi-Agent Automation & Orchestration System

Node.js, WebSockets

Engineered a modular automation system that delegates tasks such as web search, data extraction, and document generation using structured agent workflows. Designed real-time orchestration layer with task routing and streaming logs.

EDUCATION

Bachelor of Computer Applications (BCA) – 1st Year (Semester 2)

Expected Graduation: 2028
